

# Installing your

an easy process that will help you target the right areas and save you time

## Mounting your Insectagon

**A)** Installing your Insectagon with a 2-way tape is the easiest securing method, this method will save you time inside the account.

- First remove one side of the 2-way tape and placing it on the back of the station.
- When you are ready to install the Insectagon in your account remove the second side of the tape. Then apply your Insectagon in areas of concern.
- Apply your preferred bait and close station.

**B)** Installing your Insectagon by a screw will allow for a longer lasting position. This is also recommended in high traffic areas or when there is a higher risk of children or pets in the area.

- To mount your Insectagon by using a screw first open the Insectagon. You will find a screw placement hole. Place the screw inside the hole and drive the screw into the surface, for example: cabinet, baseboard, wall, appliances, deck, fence, or any other areas of concern in your account.
- Close the Insectagon after installing.

## Cleaning & Refilling

For cleaning and refilling your Insectagon takes a couple easy steps. Refilling will allow your Insectagon to sustain the natural pheromones left over from past activity. Giving your Insectagon the **advantage** in attracting future activity.

- A)** First open your Insectagon from the install location (there is no need to uninstall during the cleaning and refilling process).
- B)** After you have open your Insectagon pull on the bait box to remove from the station.
- C)** Clean your bait box.
- D)** To reinstall the bait box simply align the indent in the box with the holding tab, then click back into place.

# THE NEXT GENERATION BAIT STATION, DESIGNED BY PROFESSIONALS FOR PROFESSIONALS

FINALLY, A BAIT STATION THAT HAS ALL OF THE FEATURES YOU WANT, AND THE EFFECTIVENESS YOUR CUSTOMERS NEED

## Discreet, durable design

Say goodbye to those flimsy, disposable versions and the hassles of replacing them. INSECTAGON™ features a durable plastic casing and simple loading mechanism that flips open for reloading. Discreet colouring makes it ideal for mounting to base boards.

## Easy to use

Simply apply the adhesive strip to the back of the INSECTAGON, load with your preferred bait and mount strategically to virtually any surface.

## Field-tested & proven

For several months experts have been testing INSECTAGON with their clients to ensure it lives up to expectations, and the results have been more than encouraging. Our pros loved the rugged casing, discreet appearance and effectiveness for eliminating roaches and ants.

## Refilling is a snap

INSECTAGON works with gel and granular bait as well as pheromone glue boards. To refill, simply open the trap, reload with your preferred bait and snap shut.

## Great source of recurring revenue

Your customers will love the discreet appearance and effectiveness of INSECTAGON, and inspecting and reloading provides a great opportunity for return visits and service upgrades.

## About the Inventor

As the owner of **ASAP Pest Control**, **Jamie Drennan** knows first hand how important it is to have professional strength solutions that really work. Afterall, your reputation is based on the quality and effectiveness of the tools you have at your disposal. INSECTAGON is his latest invention, and is designed to fill a real need in the market for a durable, discreet and effective pest control device.
